Vendor	PartNum.	DDRTyp	Size	SS/DS	Chip Brand	ChipNum.	Timing - Dimm(Bios)	Vol.	0	0	0

4 Dimm :

- A*: Supports one module inserted in any slot as Single-channel memory configuration
- B*: Supports one pair of modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration
- C*: Supports 4 modules inserted into both the blue and black slots as two pairs of Dual-channel memory configuration

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.

-It is recommended to install the memory modules from the slots for better overclocking capability.

-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.
