### ASUS Recycling/Takeback Services

ASUS recycling and takeback programs come from our commitment to the highest standards for protecting our environment. We believe in providing solutions for you to be able to responsibly recycle our products, batteries, other components, as well as the packaging materials. Please go to <http://csr.asus.com/english/Takeback.htm> for the detailed recycling information in different regions.

### REACH

Complying with the REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) regulatory framework, we published the chemical substances in our products at ASUS REACH website at <http://csr.asus.com/english/REACH.htm>

### Federal Communications Commission Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference; and
- This device must accept any interference received including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

---

The use of shielded cables for connection of the monitor to the graphics card is required to assure compliance with FCC regulations. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

---

## RF exposure warning

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

## Canadian Department of Communications Statement

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.

This class B digital apparatus complies with Canadian ICES-003.

## Macrovision Corporation Product Notice

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only **unless otherwise authorized by Macrovision Corporation**. Reverse engineering or disassembly is prohibited.

### *Lithium-Ion Battery Warning*

**CAUTION:** Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

## Safety information

---

Disconnect the AC power and peripherals before cleaning. Wipe the Desktop PC using a clean cellulose sponge or chamois cloth dampened with solution of nonabrasive detergent and a few drops of warm water then remove any extra moisture with a dry cloth.

---

- **DO NOT** place on uneven or unstable work surfaces. Seek servicing if the casing has been damaged.
- **DO NOT** expose to dirty or dusty environments. **DO NOT** operate during a gas leak.
- **DO NOT** place or drop objects on top and do not shove any foreign objects into the Desktop PC.
- **DO NOT** expose to strong magnetic or electrical fields.
- **DO NOT** expose to or use near liquids, rain, or moisture. **DO NOT** use the modem during electrical storms.
- Battery safety warning: **DO NOT** throw the battery in fire. **DO NOT** short circuit the contacts. **DO NOT** disassemble the battery.
- Use this product in environments with ambient temperatures between 0°C (32°F) and 40°C (104°F).
- **DO NOT** cover the vents on the Desktop PC to prevent the system from getting overheated.
- **DO NOT** use damaged power cords, accessories, or other peripherals.
- To prevent electrical shock hazard, disconnect the power cable from the electrical outlet before relocating the system.
- Seek professional assistance before using an adapter or extension cord. These devices could interrupt the grounding circuit.
- Ensure that your power supply is set to the correct voltage in your area. If you are not sure about the voltage of the electrical outlet you are using, contact your local power company.
- If the power supply is broken, do not try to fix it by yourself. Contact a qualified service technician or your retailer.

## Setting up your computer

This section guides you through connecting the main hardware devices, such as the external monitor, keyboard, mouse, and power cord, to your computer.

### Using the onboard display output ports

Connect your monitor to the onboard display output port.

#### To connect an external monitor using the onboard display output ports:

1. Connect your monitor to the VGA port, DVI-D port, or display port of your computer.
2. Plug your monitor to a power source.

### BM6635(MD560)

## BM6835

## BP6335(SD560)

- If your computer comes with an ASUS Graphics Card, the graphics card is set as the primary display device in the BIOS. Hence, connect your monitor to a display output port on the graphics card.
- To connect multiple external monitors to your computer, refer to **Connecting multiple external monitors** in Chapter 3 of this user manual for details.

## Connecting a USB keyboard and a USB mouse

Connect a USB keyboard and a USB mouse to the USB ports on the rear panel of your computer.

### BM6635(MD560)

### BM6835

## BP6335(SD560)

## Connecting the power cord

Connect one end of the power cord to the power connector on the rear panel of your computer and the other end to a power source.

## Turning your computer ON/OFF

This section describes how to turn on/off your computer after setting up your computer.

### Turning your computer ON

To turn your computer ON:

1. Turn your monitor ON.
2. Turn the power switch ON (for BM6835 only).
3. Press the power button on your computer.

BM6635(MD560)

BM6835

BP6335(SD560)

4. Wait until the operating system loads automatically.

### Turning your computer OFF

To turn your computer OFF:

1. Close all running applications.
2. Click  on the Windows® desktop.
3. Click  to shut down the operating system.

## Using Windows® 7

### Starting for the first time

When you start your computer for the first time, a series of screens appear to guide you in configuring the basic settings of your Windows® 7 operating system.

#### To start for the first time:

1. Turn your computer on. Wait for a few minutes until the **Set Up Windows** screen appears.
2. From dropdown list, select your language, then click **Next**.
3. From the dropdown lists, select your **Country or region**, **Time and currency**, and **Keyboard layout**, then click **Next**.
4. Key in unique names for the **user name** and **computer name**, then click **Next**.
5. Key in the necessary information to set up your password, then click **Next**. You may also click **Next** to skip this step without entering any information.

---

If you want to set up a password for your account later, refer to the section **Setting up a user account and password** in this chapter.

---

6. Carefully read the license terms. Tick **I accept the license terms** and click **Next**.
7. Select **Use recommended settings** or **Install important updates only** to set up the security settings for your computer. To skip this step, select **Ask me later**.
8. Review your date and time settings. Click **Next**. The system loads the new settings and restarts. You may now start using your computer.

# Using Windows® 7 desktop

---

Click the Start icon  > Help and Support to obtain more information about Windows® 7.

---

## Using the Start menu

The Start menu gives you access to programs, utilities, and other useful items on your computer. It also provides you with more information about Windows 7 through its **Help and Support** feature.

### Launching items from the Start menu

**To launch items from the Start menu:**

1. From the Windows® taskbar, click the Start icon .
2. From the Start menu, select the item that you want to launch.

---

You may pin programs that you want constantly displayed on the Start menu. For more details, refer to the section **Pinning programs on the Start menu or taskbar** on this chapter.

---

## Using the Getting Started item

The **Getting Started** item on the Start menu contains information about some basic tasks such as personalizing Windows®, adding new users, and transferring files to help you to familiarize yourself with using Windows® 7.

**To use the Getting Started item:**

1. From the Windows® taskbar, click the Start icon  to launch the Start menu.
2. Select **Getting Started**. The list of available tasks appears.
3. Select the task that you want to do.

## Using the taskbar

The taskbar allows you to launch and manage programs or items installed on your computer.

### Launching a program from the taskbar

**To launch a program from the taskbar:**

- From the Windows® taskbar, click an icon to launch it. Click the icon again to hide the program.

---

You may pin programs that you want constantly displayed on the taskbar. For more details, refer to the section **Pinning programs on the Start menu or taskbar** on this chapter.

---

## Pinning items on the jumplists

When you right-click an icon on the taskbar, a jumplist launches to provide you with quick-access to the program's or item's related links. You may pin items on the jumplist such as favorite websites, often-visited folders or drives, or recently played media files.

### To pin items to the jumplist:

1. From the taskbar, right-click an icon.
2. From the jumplist, right-click the item that you want to pin, then select **Pin to this list**.

## Unpinning items from the jumplist

### To unpin items from the jumplist:

1. From the taskbar, right-click an icon.
2. From the jumplist, right-click the item that you want to remove from the jumplist, then select **Unpin from this list**.

## Pinning programs on the Start menu or taskbar

### To pin programs on the Start menu or taskbar:

1. From the Windows® taskbar, click the Start icon  to launch the Start menu.
2. Right-click the item that you want to pin on the Start menu or taskbar.
3. Select **Pin to Taskbar** or **Pin to Start menu**.

---

You may also right-click on the icon of a running program on the taskbar, then select **Pin this program to taskbar**.

---

## Unpinning programs from the Start menu

### To unpin programs from the Start menu:

If you select **Let Windows choose**, Windows will not back up your programs, FAT-formatted files, Recycle Bin files, or temporary files that are 1GB or more.

---

5. Follow the onscreen instructions to finish the process.

## Restoring your system settings

The Windows® System Restore feature creates a restore point where the computer's system settings are stored at certain time and date. It allows you to restore or undo changes to your computer's system settings without affecting your personal data.

To restore your system:

1. Close all running applications.
2. Click  > **All Programs > Accessories > System Tools > System Restore**.
3. Follow the onscreen instructions to complete the process.

## Protecting your computer

### Using Windows® 7 Action Center

Windows® 7 Action Center provides you with alert notifications, security information, system maintenance information, and the option to automatically troubleshoot and fix some common computer problems.

You may customize the notifications. For more details, refer to the previous section **Customizing icons and notifications** in this chapter.

### Launching Windows® 7 Action Center

To launch Windows® 7 Action Center:

1. To launch Windows 7 Action Center, click the Notification icon , then click **Open Action Center**.
2. From Windows 7 Action Center, click the task that you want to do.

### Using Windows® Update

Windows Update allows you to check and install the latest updates to enhance the security and performance of your computer.

### Launching Windows® Update

To launch Windows® Update:

1. From the Windows® taskbar, click the Start icon  to launch the Start menu.
2. Select **All Programs > Windows Update**.
3. From the Windows Update screen, click the task that you want to do.

## Setting up a user account and password

You may create user accounts and passwords for people who will use your computer.

### Setting up a user account

To set up a user account:

1. From the Windows® taskbar, click  > **Getting Started > Add new users**.
2. Select **Manage another account**.
3. Select **Create a new account**.
4. Key in the name of the new user.

## Connecting devices to your computer

### Connecting a USB storage device

This desktop PC provides USB 2.0/1.1 and USB 3.0 ports on both the front and rear panels. The USB ports allow you to connect USB devices such as storage devices.

#### To connect a USB storage device:

- Insert the USB storage device to your computer.

You can enable or disable the front and rear USB 2.0 and USB 3.0 ports individually from the BIOS Setup. Refer to the **Configuring the USB ports using the BIOS** section in Chapter 4 of this user manual for details.

## Using your computer

### Proper posture when using your Desktop PC

When using your Desktop PC, maintaining the proper posture is necessary to prevent strain to your wrists, hands, and other joints or muscles. This section provides you with tips on avoiding physical discomfort and possible injury while using and fully enjoying your Desktop PC.

#### To maintain the proper posture:

- Position your computer chair to make sure that your elbows are at or slightly above the keyboard to get a comfortable typing position.
- Adjust the height of your chair to make sure that your knees are slightly higher than your hips to relax the backs of your thighs. If necessary, use a footrest to raise the level of your knees.
- Adjust the back of your chair so that the base of your spine is firmly supported and angled slightly backward.
- Sit upright with your knees, elbows and hips at an approximately 90° angle when you are at the PC.
- Place the monitor directly in front of you, and turn the top of the monitor screen even with your eye level so that your eyes look slightly downward.
- Keep the mouse close to the keyboard, and if necessary, use a wrist rest for support to reduce the pressure on your wrists while typing.
- Use your Desktop PC in a comfortably-lit area, and keep it away from sources of glare such as windows and straight sunlight.
- Take regular mini-breaks from using your Desktop PC.

## Using the optical drive (on selected models only)

### Inserting an optical disc

#### To insert an optical disc:

1. While your system is on, press the eject button below the drive bay cover to open the tray.
2. Place the disc to the optical drive with the label side facing up.
3. Push the tray to close it.
4. Select a program from the AutoPlay window to access your files.

---

If AutoPlay is NOT enabled in your computer, click Windows® 7 **Start** button on the taskbar, click **Computer**, and then double-click the CD/DVD drive icon to access the data on it.

---

### Removing an optical disc

#### To remove an optical disc:

1. While the system is on, do either of the following to eject the tray:
  - Press the eject button below the drive bay cover.
  - Right-click the CD/DVD drive icon on the **Computer** screen, and then click **Eject**.
2. Remove the disc from the disc tray.

## Configuring the USB ports using the BIOS

You can enable or disable the front and rear USB 2.0 and USB 3.0 ports from the BIOS Setup.

**To disable or enable the front and rear USB 2.0 and 3.0 ports:**

1. Press <Delete> to enter the BIOS Setup at startup.
2. From the BIOS Setup screen, click **Advanced** > **USB Configuration**.
3. Select the USB port that you want to enable or disable.
4. Press <Enter> to enable or disable the selected USB port.
5. Click **Exit** and select **Save Changes & Reset** to save the changes made.

Refer to Chapter 1 for the locations of the USB ports.

## Connecting to the Internet

### Wired connection

Use an RJ-45 cable to connect your computer to a DSL/cable modem or a local area network (LAN).

#### Connecting via a DSL/cable modem

To connect via a DSL/cable modem:

1. Set up your DSL/cable modem.

Refer to the documentation that came with your DSL/cable modem.

2. Connect one end of an RJ-45 cable to the LAN (RJ-45) port on the rear panel of your computer and the other end to a DSL/cable modem.

# Chapter 6

## Using the utilities

The Support DVD and Recovery DVD may not be included in the package. You may use the system recovery partition feature to create the Support DVD and Recovery DVD. For details, refer to **Recovering your system** in this chapter.

### ASUS AI Suite II

ASUS AI Suite II is an all-in-one interface that integrates several ASUS utilities and allows users to launch and operate these utilities simultaneously.

This utility is pre-installed on some models. For models without an operating system, follow the steps below to install this utility.

### Installing AI Suite II

#### To install AI Suite II:

1. Place the support DVD in the optical drive. The Drivers installation tab appears if Autorun is enabled.
2. Click the **Utilities** tab, then click **ASUS AI Suite II**.
3. Follow the onscreen instructions to complete the installation.

### Using AI Suite II

AI Suite II automatically starts when you enter the Windows® operating system. The AI Suite II icon appears in the Windows® notification area. Click the icon to open the AI Suite II main menu bar.

Click each button to select and launch a utility, to monitor the system, to update the motherboard BIOS, to display the system information, and to customize the settings of AI Suite II.

Click to select a utility

Click to update the motherboard BIOS

Click to show the ASUS support information

Click to monitor sensors or CPU frequency

Click to show the system information

Click to customize the interface settings

- The applications in the Tool menu vary with models.
- The screenshots of AI Suite II in this user manual are for reference only. The actual screenshots vary with models.

## The Tool menu

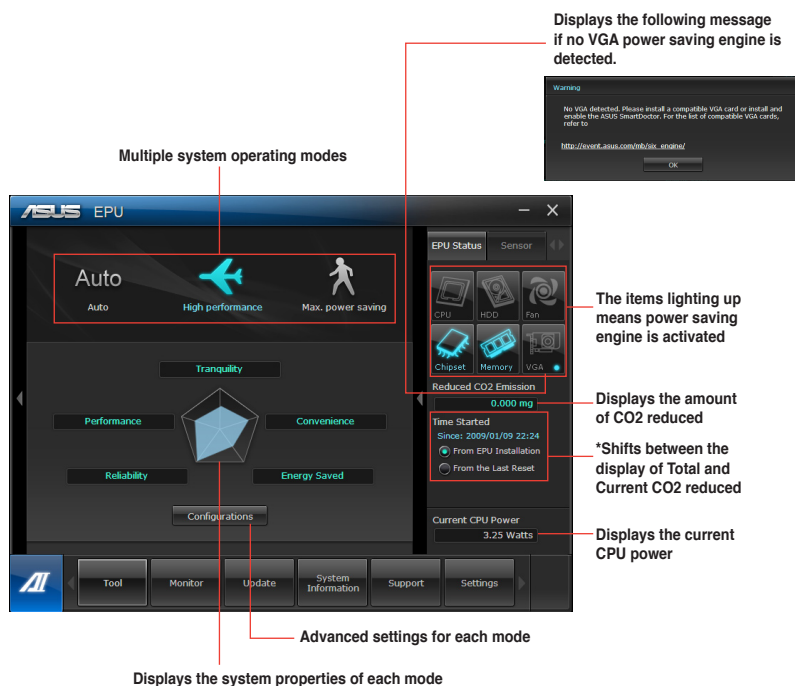

The **Tool** menu includes the EPU, Probe II, and Sensor Recorder panels.

### Launching and configuring EPU

EPU is an energy-efficient tool that provides you with a total power-saving solution. It detects the current loading and intelligently adjusts the power usage in real-time. When you select the Auto mode, the system changes modes automatically according to the current system status. It allows you to customize each mode through configuring the settings such as CPU frequency, vCore Voltage, and Fan Control.

#### To launch EPU:

- Click **Tool > EPU** on the AI Suite II main menu bar.

- \* Select **From EPU Installation** to show the CO2 that has been reduced since you installed EPU.
- \* Select **From the Last Reset** to show the total CO2 that has been reduced since you click the Clear button .

## Launching and configuring Probe II

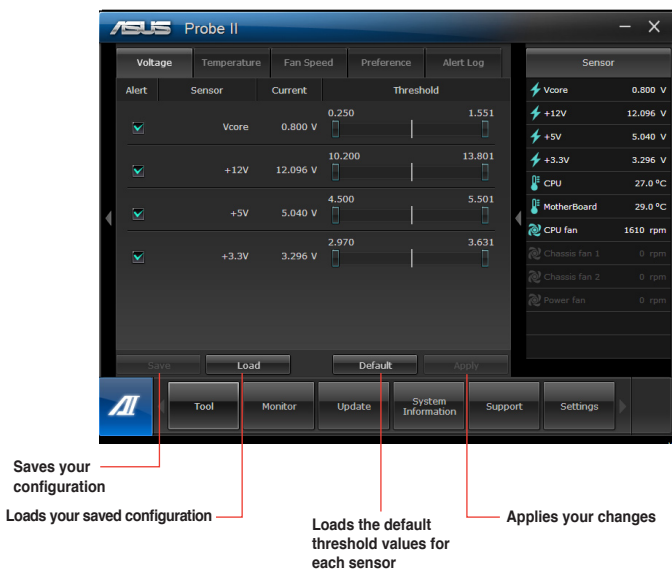

Probe II is a utility that monitors the computer's vital components, and detects and alerts you of any problem with these components. Probe II senses fan rotations, CPU temperature, and system voltages, among others. With this utility, you are assured that your computer is always at a healthy operating condition.

### To launch Probe II:

- Click **Tool > Probe II** on the AI Suite II main menu bar.

### To configure Probe II:

- Click the **Voltage/Temperature/Fan Speed** tabs to activate the sensors or to adjust the sensor threshold values.
- The **Preference** tab allows you to customize the time interval of sensor alerts, or change the temperature unit.

# Lauching and configuring Sensor Recorder

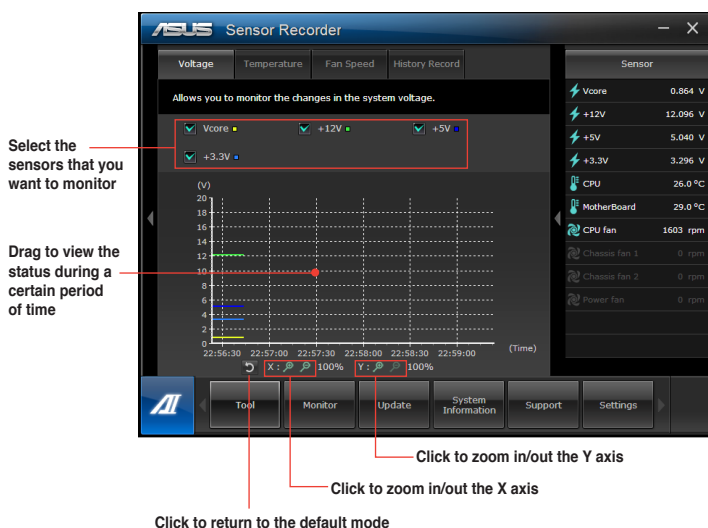

Sensor Recorder allows you to monitor the changes in the system voltage, temperature, and fan speed, as well as recording the changes.

## To launch Sensor Recorder:

- Click **Tool > Sensor Recorder** on the AI Suite II main menu bar.

## To configure Sensor Recorder:

- Click the **Voltage/Temperature/Fan Speed** tabs and select the sensors that you want to monitor.
- The **History Record** tab allows you to record the changes in the sensors that you enable.

## The Monitor menu

The **Monitor** menu includes the Sensor and CPU Frequency panels.

### Launching Sensor

The Sensor panel displays the current value of a system sensor such as fan rotation, CPU temperature, and voltages.

#### To launch Sensor:

- Click **Monitor** > **Sensor** on the AI Suite II main menu bar.

### Launching CPU Frequency

The CPU Frequency panel displays the current CPU frequency and CPU usage.

#### To launch CPU frequency:

- Click **Monitor** > **CPU Frequency** on the AI Suite II main menu bar.

## The Update menu

The Update menu allows you to update the motherboard BIOS and the BIOS boot logo with the ASUS designed update utilities.

### ASUS Update

The ASUS Update is a utility that allows you to manage, save, and update the motherboard BIOS in Windows® OS. The ASUS Update utility allows you to **update the BIOS directly** from the Internet, **download the latest BIOS file from the Internet**, **update the BIOS from an** updated BIOS file, save the current BIOS file or view the BIOS version information.

#### Updating the BIOS through the Internet

##### To update the BIOS through the Internet:

1. From the ASUS Update screen, select **Update BIOS from Internet**, then click **Next**.
2. Select the ASUS FTP site nearest you to avoid network traffic.  
Tick the two items if you want to enable the BIOS downgradable and Auto-BIOS backup functions.
3. Select the BIOS version that you want to download, then click **Next**.  
When no updated version is detected, a message is displayed informing you that there is no new BIOS file from the BIOS server.
4. Click **Yes** if you want to change the boot logo, which is the image appearing on screen during the Power-On Self-Tests (POST). **Otherwise, click No**.
5. Follow the onscreen instructions to complete the update process.

## Updating the BIOS through a BIOS file

To update the BIOS through a BIOS file:

1. From the ASUS Update screen, select **Update BIOS from file**, then click **Next**.
2. Locate the BIOS file from the Open window, click **Open**, and click **Next**.
3. Click **Yes** if you want to change the boot logo, which is the image appearing on screen during the Power-On Self-Tests (POST). **Otherwise**, click **No**.
4. Follow the onscreen instructions to complete the update process.

## MyLogo

ASUS MyLogo allows you to customize the boot logo. The boot logo is the image that appears on screen during the Power-On Self-Tests (POST). **ASUS MyLogo allows you to:**

- Change the current BIOS boot logo of your motherboard
- Change the boot logo of a downloaded BIOS file and update this BIOS to your motherboard
- Change the boot logo of a downloaded BIOS file without updating this BIOS to your motherboard

---

Ensure that the BIOS item Full Screen Logo is set to [Enabled] to display the boot logo. See the section Boot Settings Configuration of the BIOS Setup chapter in the user manual.

---

## Changing the BIOS boot logo

1. From the AI Suite II main menu bar, click **Update > MyLogo**.
2. Select any of these three options, then click **Next**:
  - Change the BIOS boot logo of my motherboard
  - Change the boot logo of a downloaded BIOS file and update this BIOS to my motherboard
  - Change the boot logo of a downloaded BIOS file (But do not update this BIOS to my motherboard)

---

Before using the last two options, ensure that you download a BIOS file to your computer using ASUS Update.

---

3. Locate the picture file that you want to use as the boot logo (and the downloaded BIOS if required) and then click **Next**.
4. Move the **Resolution** slider or click **Auto Tune** for the system to automatically adjust the screen resolution.
5. Click the **Bootling Preview** button to preview the way the picture is displayed during the POST. Left-click the mouse to return to the setting screen.
6. Click **Next** when the adjustment is finished.
7. Click **Flash** and follow the onscreen instructions to complete the process.

## The System Information screen

The System Information screen displays the information about the motherboard, CPU, and memory slots.

- Click the **MB** tab to see the details on the motherboard manufacturer, product name, version, and BIOS.
- Click the **CPU** tab to see the details on the processor and the Cache.
- Click the **Memory** tab and then select the memory slot to see the details on the memory module installed on the corresponding slot.
- Click the **Disk** tab and then select each disk to see the details on it.

## The Support screen

The Support screen displays the information about the ASUS website, technical support website, download support website, or contact information.

## The Settings screen

The Settings screen allows you to customize the main menu bar settings and the interface's skin.

- Application allows you to select the application that you want to enable.
- Bar allows you to modify the bar setting.
- Skin allows you to customize the interface's contrast, brightness, saturation, hue, and gamma.

## ASUS WebStorage

ASUS WebStorage is designed to help you retrieve your data to your notebooks, smartphones or tablets wherever there is internet connection.

### Installing WebStorage

#### To install WebStorage:

Place the support DVD in the optical drive. Double-click the setup.exe file from the ASUS WebStorage folder in the Software folder in the support DVD.

### Launching WebStorage

To launch the WebStorage from the Windows® desktop, click **Start > All Programs > ASUS > WebStorage**. The WebStorage quick bar appears in the Windows® taskbar. Right-click this icon to switch between the quick bar and the main window.

#### Drive

Allows you to retrieve all your backups, synced files, share groups and password protected data from here. Right-click the mouse to preview files before downloading or generating a sharing URL.

#### Backup

Allows you to quickly back up your important data, set your preferences for your backup schedule, and select Auto-Backup to automatically backup your data.

#### MySyncFolder

Allows you to store your files to MySyncFolder for easy access and sharing without the limitation of location or storage space.

## Calendar

ASUS WebStorage automatically synchronizes your calendar events to all your computers to allow you to browse through your calendar from any of your computers.

## BookmarkSyncer

BookmarkSyncer allows you to save your browser preference and favorite websites in the cloud storage.

## MobileApp

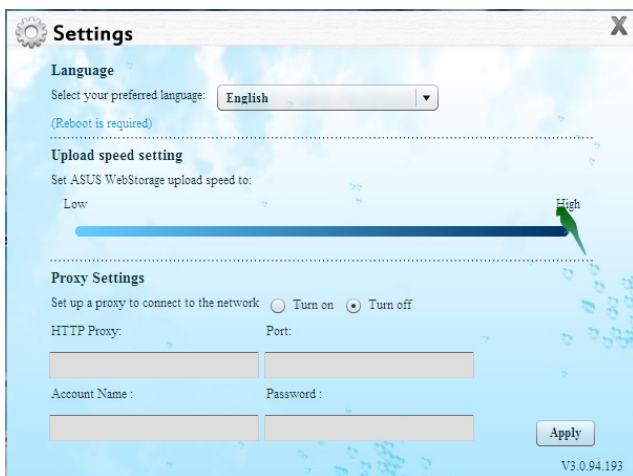

ASUS WebStorage's mobile applications allow you to synchronize your files between your mobile devices. It also allows you to preview or stream files on your mobile device.

## Go to Web

ASUS WebStorage allows you to experience its value-added cloud service without the risk of losing your data.

## Settings

1. Click the **Settings** icon  to launch the Settings screen.
2. Follow the onscreen instructions to complete the configuration.

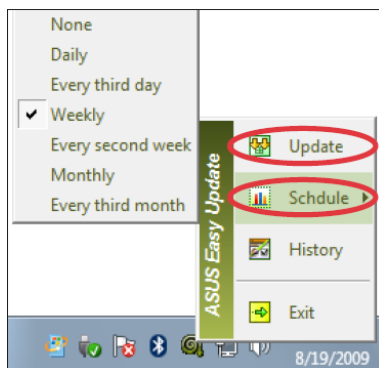

# ASUS Easy Update

ASUS Easy Update is a software tool that automatically detects the latest drivers and applications for your system.

1. From the Windows ® notification area, right-click the **ASUS Easy Update** icon.

2. Select **Schedule** to set how often you want to update your system.
3. Select **Update** to activate the update.

4. Click **OK** to display the items you can download.

5. Check the item(s) you want to download, and then click **OK**.

# ASUS Secure Delete

ASUS Secure Delete makes deleted files completely irrecoverable via a simple drag-and-drop interface, thus protecting your data security.

## To use ASUS Secure Delete:

- Do either of the following to launch ASUS Secure Delete:
  - Click the ASUS Secure Delete shortcut  on the Windows® desktop,
  - Click **Start > All Programs > ASUS > ASUS Secure Delete**.

- Do any of the following to add files to the deletion box:
  - Drag and drop the files to the deletion box.

- Right-click the file then select **ASUS Secure Delete**.

- To remove a file from the deletion list, select the file, then click .

- Tick **Delete the files listed in the recycle bin** if you want to permanently delete all the files in the recycle bin.

- Click **Clear**, and then click **OK** on the confirmation message to permanently delete all the files listed in the deletion box and the recycle bin (if selected in step 3).

# ASUS Business Suite

ASUS Business Suite is a collection of applications that help you obtain maximum performance of your business PC. It integrates the following Intel® and ASUS utilities:

- **ASUS EPU**
- **ASUS Update**
- **ASUS MyLogo 2**
- **ASUS Secure Delete**
- **Intel® SBA (Small Business Advantage)**

Intel® SBA is a combination of hardware and software features that provides unique security and productivity capabilities designed for small businesses.

## Installing ASUS Business Suite

Before installing ASUS Business Suite, you have to enable the Wake On LAN (WOL) feature. To enable WOL, enter the BIOS Setup. From the **Advanced Mode** screen, click **Advanced > APM**, and then set the **WOL (include AC Power Loss)** item to **[Enabled]**.

### To install ASUS Business Suite:

Place the support DVD in the optical drive. Double-click the setup.exe file from the ASUS Business Suite folder in the Software folder in the support DVD.

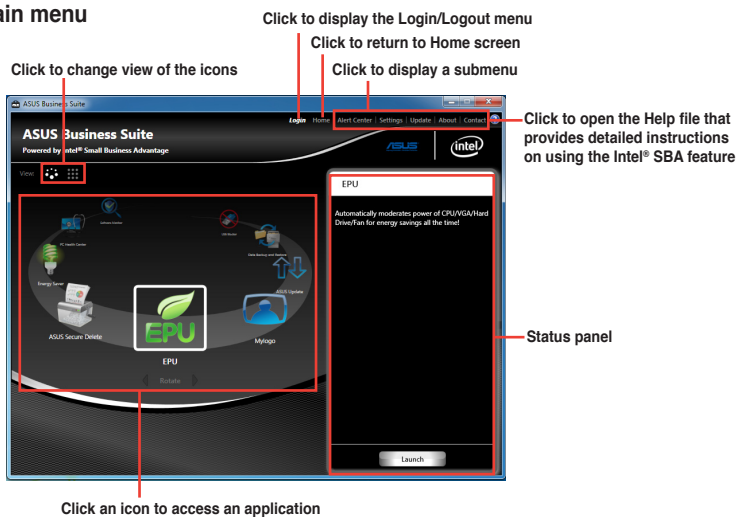

## Using ASUS Business Suite

ASUS Business Suite automatically starts when you enter the Windows® operating system. The ASUS Business Suite icon appears in the Windows® notification area. Double-click the icon to launch ASUS Business Suite.

The screenshots of ASUS Business Suite in this user manual are for reference only. The actual screenshots vary with models.

## Nero 9

Nero 9 allows you to create, copy, burn, edit, share, and update different kinds of data.

### Installing Nero 9

To install Nero 9:

1. Insert the Nero 9 DVD into your optical drive.
2. If Autorun is enabled, the main menu appears automatically.

---

If Autorun is disabled, double-click the **SeupX.exe** file from the main directory of your Nero 9 DVD.

---

3. From the main menu, click **Nero 9 Essentials**.
4. Select the language you want to use for Installation Wizard. Click **Next**.
5. Click **Next** to continue.
6. Tick **I accept the License Conditions**. When done, click **Next**.
7. Select **Typical** then click **Next**.
8. Tick **Yes, I want to help by sending anonymous application data to Nero** then click **Next**.
9. When done, click **Exit**.

### Burning files

To burn files:

1. From the main menu, click **Data Burning > Add**.
2. Select the files that you want to burn. When done, click **Add**.
3. After selecting files that you want to burn, click **Burn** to burn the files to a disc.

---

For more details about using Nero 9, refer to the Nero website at [www.nero.com](http://www.nero.com)

---

## Recovering your system

### Using the system recovery partition

The system recovery partition quickly restores your Desktop PC's software to its original working state. Before using the system recovery partition, copy your data files (such as Outlook PST files) to USB storage devices or to a network drive and make note of any customized configuration settings (such as network settings).

### About the system recovery partition

The system recovery partition is a reserved space on your hard disk drive used to restore the operating system, drivers, and utilities installed on your Desktop PC at the factory.

---

DO NOT delete the system recovery partition, which is the partition without volume label on Disk 0. The system recovery partition is created at the factory and cannot be restored if deleted. Take your Desktop PC to an authorized ASUS service center if you have problems with the recovery process.

---

### Using the system recovery partition:

1. Press <F9> during bootup.
2. Highlight Windows Setup [EMS Enabled] and press <Enter>.
3. From the Recover system to a partition screen, click <Next>.
4. Follow the onscreen instructions to complete the recovery process.

---

Visit the ASUS website at [www.asus.com](http://www.asus.com) for updated drivers and utilities.

---

## Using the Recovery DVD (on selected models)

---

Remove the external hard disk drive before performing system recovery on your Desktop PC. According to Microsoft, you may lose important data because of setting up Windows on the wrong disk drive or formatting the incorrect drive partition.

---

### To use the Recovery DVD:

1. Insert the Recovery DVD into the optical drive. Your Desktop PC needs to be powered ON.
2. Restart the Desktop PC and press **<F8>** on bootup and select the optical drive (may be labeled as "CD/DVD") and press **<Enter>** to boot from the Recovery DVD.
3. Select OK to start to restore the image.
4. Select OK to confirm the system recovery.

---

Restoring will overwrite your hard drive. Ensure to back up all your important data before the system recovery.

---

5. Follow the onscreen instructions to complete the recovery process.

---

DO NOT remove the Recovery disc, unless instructed to do so, during the recovery process or else your partitions will be unusable.

---

---

Visit the ASUS website at [www.asus.com](http://www.asus.com) for updated drivers and utilities.

# Chapter 7

## Troubleshooting

### Troubleshooting

This chapter presents some problems you might encounter and the possible solutions.

#### ? *My computer cannot be powered on and the power LED on the front panel does not light up*

- Check if your computer is properly connected.
- Check if the wall outlet is functioning.
- Check if the Power Supply Unit is switched on. Refer to the section **Turning your computer ON/OFF** in Chapter 1.

#### ? *My computer hangs.*

- Do the following to close the programs that are not responding:
  1. Simultaneously press <Alt> + <Ctrl> + <Delete> keys on the keyboard, then click **Start Task Manager**.
  2. Click **Applications** tab.
  3. Select the program that is not responding, then click **End Task**.
- If the keyboard is not responding. Press and hold the Power button on the top of your chassis until the computer shuts down. Then press the Power button to turn it on.

#### ? *I cannot connect to a wireless network using the ASUS WLAN Card (on selected models only)?*

- Ensure that you enter the correct network security key for the wireless network you want to connect to.
- Connect the external antennas (optional) to the antenna connectors on the ASUS WLAN Card and place the antennas on the top of your computer chassis for the best wireless performance.

#### ? *The arrow keys on the number key pad are not working.*

Check if the Number Lock LED is off. When the Number Lock LED is on, the keys on the number key pad are used to input numbers only. Press the Number Lock key to turn the LED off if you want to use the arrow keys on the number key pad.

### ? *No display on the monitor.*

- Check if the monitor is powered on.
- Ensure that your monitor is properly connected to the video output port on your computer.
- If your computer comes with a discrete graphics card, ensure that you connect your monitor to a video output port on the discrete graphics card.
