

Step1: Make sure the AC adapter is connected to system.

Step2: Download the file (1008HA.ZIP), unzip the file to get the 1008HA.EXE and saving to a folder on your hard drive (make a note of the folder where the downloaded file is saved).

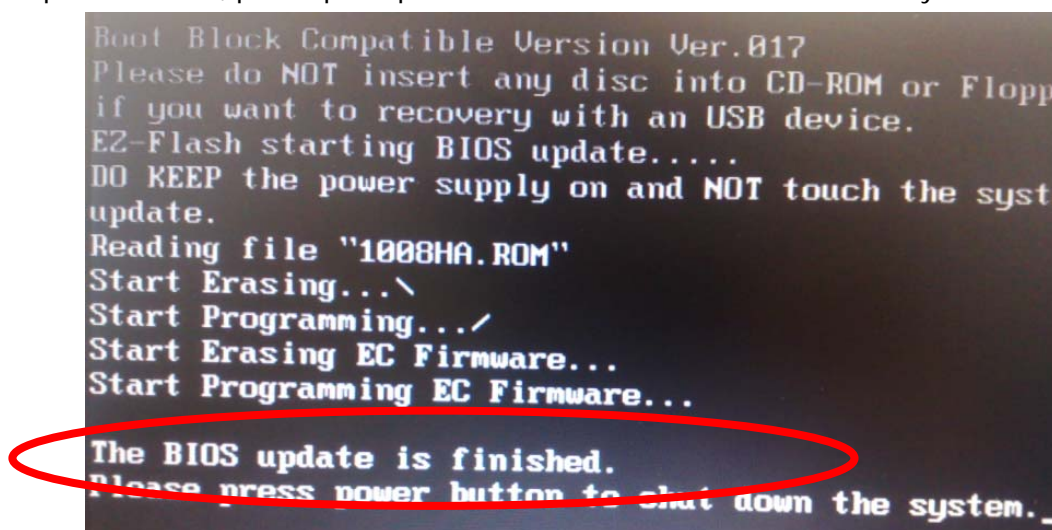

Step3: Double-click the downloaded file (1008HA.EXE) and press "YES" to reboot system.

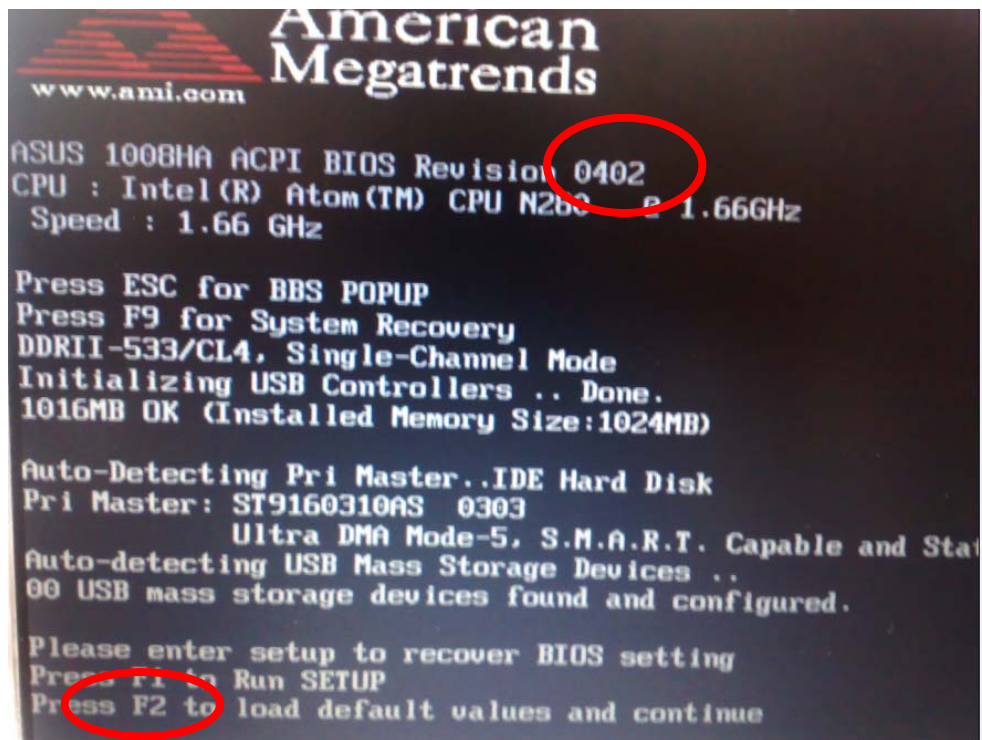

Step4: Do keep the power supply on and not touch the system while performing BIOS update.

Step5: BIOS update finished, please press power button to shut down & restart the system.

Step6: Check the BIOS revision is "0402" and press "F2" to load default values and continue.

Step7: Finish
