4 Dimm :
- **A*:** Supports one module inserted in any slot as Single-channel memory configuration.
- **B*:** Supports one pair of modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration
- **C*:** Supports 4 modules inserted into both the blue and black slots as two pairs of Dual-channel memory configuration

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.
-It is recommended to install the memory modules from the Blue slots for better overclocking capability.
-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.

4 Dimm :
- **A*:** Supports one module inserted in any slot as Single-channel memory configuration.
- **B*:** Supports one pair of modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration
- **C*:** Supports 4 modules inserted into both the blue and black slots as two pairs of Dual-channel memory configuration

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.
-It is recommended to install the memory modules from the Blue slots for better overclocking capability.
-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.

KINGSTON	KHX2133C9AD3T1K3/6GX(XMP)	DDR3 2133	6GB(3 x 2GB)	DS	N/A	Heat-Sink Package	9(1333-9-9-9-24)	1.65	•	•	•

4 Dimm :
- **A*:** Supports one module inserted in any slot as Single-channel memory configuration.
- **B*:** Supports one pair of modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration
- **C*:** Supports 4 modules inserted into both the blue and black slots as two pairs of Dual-channel memory configuration

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.
-It is recommended to install the memory modules from the Blue slots for better overclocking capability.
-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.

P7P55D DELUXE DDR3 2200 Qualified Vendors List (QVL)

Vendor	Part No.	Type	Size	SS/DS	Chip Brand	Chip NO.	Timing DIMM(Bios)	Voltage	A*	B*	C*
G.SKILL	F3-17600CL8D-4GBPS(XMP)	DDR3 2200	4096MB(Kit of 2)	DS	N/A	Heat-Sink Package	8-8-8-24(1333-9-9-9-24)	1.65	•	•	•
G.SKILL	F3-17600CL8D-4GBTDS(XMP)	DDR3 2200	4096MB(Kit of 2)	DS	N/A	Heat-Sink Package	9-9-9-24(1333-9-9-9-24)	1.65	•	•	•
G.SKILL	F3-17600CL7T-6GBPIS	DDR3 2200	6GB(3x2GB)	DS	N/A	Heat-Sink Package	8-8-8-24	1.55-1.65	•	•	•
A-DATA	AX3U2200PB2G9-DP2P	DDR3 2200	4GB(2 x 2GB)	DS	N/A	Heat-Sink Package	8-8-8-24	1.55~1.65	•	•	•

6 Dimm :
- **A*:** Supports one module inserted in any slot as Single-channel memory configuration.
- **B*:** Supports one pair of modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration
- **C*:** Supports 4 modules inserted into both the blue and black slots as two pairs of Dual-channel memory configuration
