8 DIMM Slots

- **2 DIMMs:** Supports two (2) modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration.

  We suggest that you install the modules into slots B1 and D1 for better compatibility.

- **4 DIMMs:** Supports four (4) modules inserted into either the blue slots or the black slots as one DIMM per channel for Quad-channel memory configuration.

  We suggest that you install the modules into slots A1/B1/C1/D1 for better compatibility.

- **6 DIMMs:** Supports six (6) modules inserted into both the blue and black slots as two pairs of Dual-channel and one pair of the other Dual-channel for Quad-channel memory configuration.

  We suggest that you install the modules into slots A1/B1/B2/C1/D1/D2 for better compatibility.

- **8 DIMMs:** Supports eight (8) modules inserted into all the blue and black slots as full-loading of Quad-channel memory configuration.

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.

-It is recommended to install the memory modules from the slots for better overclocking capability.

-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.

8 DIMM Slots

- **2 DIMMs:** Supports two (2) modules inserted into either the blue slots or the black slots as one pair of Dual-channel memory configuration.
  We suggest that you install the modules into slots B1 and D1 for better compatibility.

- **4 DIMMs:** Supports four (4) modules inserted into either the blue slots or the black slots as one DIMM per channel for Quad-channel memory configuration.
  We suggest that you install the modules into slots A1/B1/C1/D1 for better compatibility.

- **6 DIMMs:** Supports six (6) modules inserted into both the blue and black slots as two pairs of Dual-channel and one pair of the other Dual-channel for Quad-channel memory configuration.
  We suggest that you install the modules into slots A1/B1/B2/C1/D1/D2 for better compatibility.

- **8 DIMMs:** Supports eight (8) modules inserted into all the blue and black slots as full-loading of Quad-channel memory configuration.

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.

-It is recommended to install the memory modules from the slots for better overclocking capability.

-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.
