• **Why automatically pattern updating is so important ?**

On an average, over five new viruses are being created each day over the worldwide. Automatic updating the virus patterns and updating the scan engine are the important functions to prevent virus attacks. To ensure a complete registration, the serial number and license key must be both correctly entered. If either information is not complete entered, your PC-cillin 2002 OEM version will not be able to receive automatic updates. A correct registration will thus ensure user to receive uninterrupted automatic virus patterns and scan engines for up to **90** days. Before expiry, you will receive an email from Trend Micro to remind you further registration with little money.
