ASUS

TV Tuner Card

*My Cinema-P7131D*
My Cinema-P7131

1.   Welcome!

Thank you for buying an ASUS® TV Tuner Card!

The ASUS® TV Tuner Card integrates several multimedia functions that allow you to transform your PC into the ultimate entertainment center. With the ASUS® TV Tuner Card, you can watch and record live TV, capture and play back videos, make VCD/DVD movies, listen to MP3 music, tune in to your favorite FM station, and view photos on your PC.
Bundled with the ASUS® remote controller and the CyberLink PowerCinema application, the ASUS® TV Tuner Card offers performance, functionality, and enjoyment.

5.   Software information

This section gives an overview of the CyberLink PowerCinema application that comes with the ASUS® TV Tuner Card. This application allows you to watch TV and DVDs, listen to FM radio or music CDs, or browse photos stored in your computer. Use the mouse or the remote controller to navigate through the user interface. For details on the remote controller, see pages 1-4 and 1-5.

5.1   Cyberlink PowerCinema

The main menu has six multimedia functions. Select the function you want by pressing the up/down arrow key on the remote controller or by using the mouse. To launch the function, press ⓔⓝⓣⓔⓡ on the remote controller or click the mouse.

For more information on the PowerCinema application, click here.

TV

- Record live TV

5.2   VideoSecurity Online

VideoSecurity Online is a powerful monitoring and motion-detecting software. With video capture devices such as CCD, V8, digital Hi-8 and others, you can use VideoSecurity Online to:

- find intruders
- monitor your environment
- detect changes in a specified location
- know in advance who your visitors are

Upon detection of any variation, whether it is an error or not, VideoSecurity Online will do the following:

- save the date/time information on when the condition started, and when to release tracing to a database file. (watchdog.mdb)
- capture the condition detected and save it into a bitmap file with reference to an image that represents the normal situation before VideoSecurity Online started detecting the variation. You may view any image processing software to view, modify, or distribute the image.

This database file is saved in the Programs folder.

VideoSecurity Online also lets the user choose from four options on how to handle the variation or unusual condition detected.

For more information, click here.
